

## The Company

- xSQUARE started her journey with building AI kits mounted on manual forklifts to convert them for autonomous use. After a successful commercial implementation, the company expanded the tech stack and services to include robotics orchestration systems in warehouses, and is currently building optimization layers with the vision to “move goods like water”.

## The Technology

- Creation of global standing AI stack for autonomous forklift licensed by a GLOBAL OEM in 7 months.

## The Team

- 5 Engineers with space/satellite technology experience, led by a CTO from Germany.

## The Achievements

- Commercial customers within 24 months of company starting operations including Kateon Natie, GlaxoSmithKlein, Army Logistics Base (Singapore), and one of the world’s leaders in carbonated drinks, among others.
- Partnership with a GLOBAL OEM for distribution of Autonomous Forklifts in Asia Pacific.
